**Anyone can feel anxious or struggle with their mental health.**

There are times when we all feel down or stressed. Usually these feelings pass, but sometimes they can continue and start to affect day-to-day life. This could happen to anyone, at any time in their life.

If you're feeling low or struggling with your mental health, there might not be any obvious reason why. Or, you could be going through a bereavement, having money or relationship problems, or trying to cope as a new parent. Life can be tough. The challenges we face can have a big impact on our mental wellbeing.

If you need to find information or help for yourself, or someone you're worried about, it can be difficult to know where to turn.

# Self-help tips to take care of your mental wellbeing

Life can be busy and it's not always easy to find the time to look after yourself. Taking some small steps, however, can help you feel calmer, boost your mood and help combat the effects of stress and anxiety. Visit [www.mindwell-leeds.org.uk/feel-better](http://www.mindwell-leeds.org.uk/feel-better) for more self-care tools and advice.

## Connect with others

Finding ways to feel connected to other people can mean keeping in contact with family, friends or neighbours, or becoming part of a social group or network online or in your local area.

## Look after your physical health

Taking care of your physical health can help improve your mood and mental wellbeing and also manage your energy levels. Small actions can make a big difference, and could include taking moderate, regular exercise, eating a balanced diet, getting a good night's sleep and reducing caffeine, alcohol and smoking.

## Keep learning

Doing something different can help you switch off, refocus thoughts away from everyday worries and concerns and even be relaxing or calming. Give yourself a challenge - try a new activity, start a new hobby or join a creative class.

## Volunteer to help others

Volunteering can have many benefits, whether you're giving time to support a good cause or community project, or helping out with friends, family or neighbours. It can boost your confidence, help you meet new people, develop skills and it can feel good to 'give back'.

## Be mindful

Pay attention to the present moment. When doing everyday tasks, ask yourself what you can see, hear, feel, smell or even taste. Spending time in a green space could help - you can breathe in fresh air and listen to the birds. Why not visit one of the many local parks in Leeds and be mindful of the world around you?
